

MD MAHAFUZ AHMED BORSHON

Cyber Security Enthusiast — Web Security Specialist

☎ +88 01706478671 ✉ mahafuzborshon@gmail.com 🔗 [linkedin.com/in/mahafuzborshon/](https://www.linkedin.com/in/mahafuzborshon/)

Summary

Trained Ethical Hacker and Website Security Specialist with hands-on experience in penetration testing, vulnerability scanning, malware analysis, and security hardening. I help businesses identify vulnerabilities, secure websites, and recover hacked systems quickly and professionally.

Technical Skills

Technical Knowledge: Linux, Bash, Python scripting, Networking Fundamentals

Tools and Practices: Nmap, Nessus, Acunetix, Burp Suite, Wireshark, Snort, Wazuh, OSINT tools

Analytical Abilities: Linux system navigation and command line fluency, Configure and analyze network traffic, Perform real penetration tests, Identify vulnerabilities in targets, Monitor and defend systems in real time

Experience

Junior Penetration Tester Intern

April 2025 – May 2025

CodemanBD (Onsite)

Tools Used: Nmap, pKexec, metasploit, OSINT tools

- **Conducted reconnaissance and vulnerability assessments on 10+ lab environments, identifying misconfigurations and exploitable services.** Performed web application testing using Nmap, Gobuster, and Metasploit, successfully exploiting multiple RCE vulnerabilities in controlled environments.
- Monitored network traffic using Wireshark and intrusion detection tools, **Analyzed network traffic using Wireshark and detected 5+ simulated intrusion attempts.**
- Assisted in preparing detailed vulnerability reports with risk ratings and remediation recommendations.
- Improved exploitation workflow efficiency by automating basic tasks using Linux command-line scripting.

Projects

Drupal Exploitation and Privilege Escalation | Metasploit

March 2025 – April 2025

- **Executed full penetration test on a vulnerable Drupal environment.**
- Discovered exposed directories and misconfigurations through enumeration.
- Extracted database credentials from configuration files leading to privilege escalation.
- Achieved root access by exploiting SUID misconfigurations and Exim4 vulnerability.

Full Security Assessment | Nmap, RCE Exploitation

February 2025 – March 2025

- Conducted a structured penetration testing engagement against a vulnerable machine (10.201.91.88).
- Enumerated services using Nmap and identified five vulnerabilities (4 Critical, 1 Medium).
- Exploited an unauthenticated Remote Code Execution vulnerability to obtain kernel-level access.
- Followed OWASP Testing Guide and PTES methodology to document findings professionally.

Core Competencies

Offensive Security: Penetration Testing, Privilege Escalation, OWASP Top 10, Web Application Security

Defensive Security: Network Security Monitoring, SIEM Analysis, Incident Response

Technical Foundations: Linux Security, Vulnerability Assessment, Risk Assessment

Certifications

- **eJPT – Junior Penetration Tester – INE Security (2025):** Industry-recognized certification validating foundational penetration testing and ethical hacking skills.
- **Certified Red Team Analyst – Cyber Warfare (2025):** Advanced offensive security certification focused on red team operations and adversary simulation.
- **Ethical Hacking – CodemanBD (2025):** Completed practical training in penetration testing, vulnerability assessment, and cybersecurity fundamentals.

- **Certified Cybersecurity Educator Professional – Red Team Leaders (2026):** Certification demonstrating capability in cybersecurity instruction and professional training.
- **Introduction to Network Analysis – Security Blue Team (2025):** Gained foundational skills in network traffic monitoring and threat detection.
- **Introduction to Cybersecurity – Cisco Networking Academy (2025):** Learned core cybersecurity principles, threats, and risk management fundamentals.
- **SEO – HubSpot (2024):** Certification covering search engine optimization strategies, keyword research, and technical SEO practices.
- **SEO II – HubSpot (2024):** Advanced SEO strategies including content optimization and performance tracking.
- **Studies, Work & Big World – Level Two – British Council (2024):** Developed communication, workplace readiness, and global engagement skills.
- **Generative AI – LinkedIn Learning (2026):** Completed training on AI fundamentals, generative models, and applied AI tools.

Education

B.Sc. Cyber Security Engineering
University of Frontier Technology, Bangladesh

Program: Undergraduate
CGPA: 3.5 / 4
